"I understand that discharging pollutants in storm water associated with regulated activity to waters of the State that is not authorized by NPDES permit coverage is a violation of State law. I also understand that the submittal of this request for termination does not release the operator from liability for any violations of this permit, ADEM Administrative Code Chapter 335-6-6, or other ADEM rules until a complete and correct request for termination of the permit is received by the Department. I understand that the permittee, operator, owner, developer, contractors, home builder(s), property owners association, etc., separately or collectively, must retain permit coverage for subdivision developments or other phased developments until all disturbance activity, including individual home construction, is substantially complete. I understand that should an inspection or complaint reveal significant noncompliance with ADEM rules, an environmental problem related to the discharge of stormwater from the site or that incorrect information has inadvertently been provided, implementation of remedial measures may be required, to include resubmittal of the NOI in order to correct any deficiencies, comply with federal stormwater permitting requirements, and provide for the protection of water quality. I certify under penalty of law that this form, the CBMPP, and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the qualified credentialed professional (QCP) and other person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, correct, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations."
